Requirements Capture & Modelling

Requirements Analysis

(iteration 1 & 2)
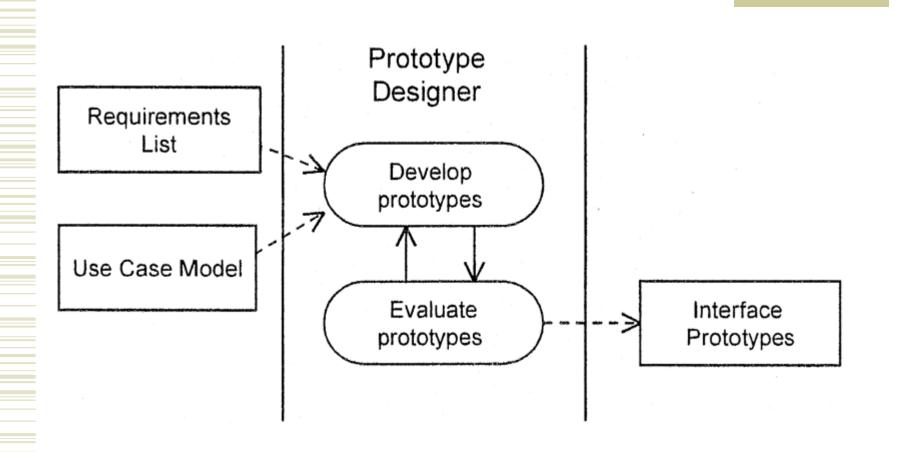

Requirements capture & modelling
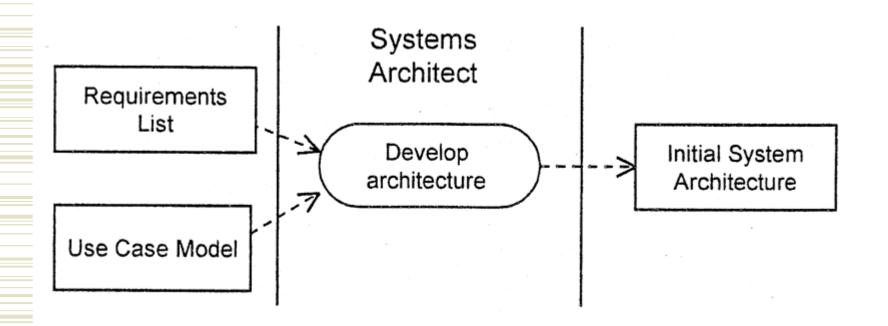

Capturing requirements

Developing prototypes

# Developing initial architecture
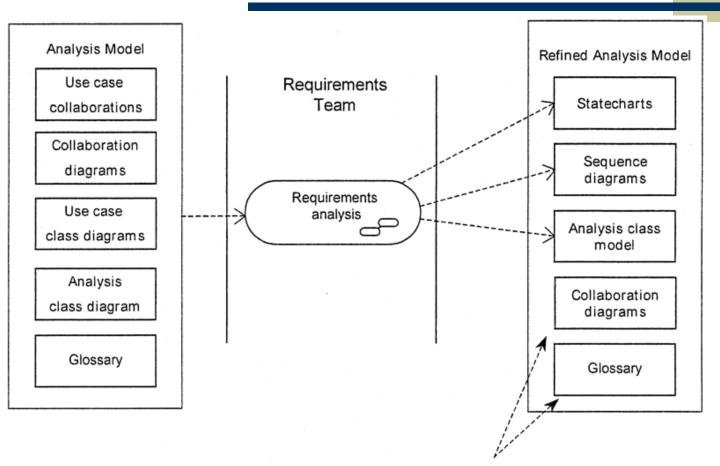

# Requirements analysis

Use case realisations

Analysis elements creation & update

Note that collaboration diagrams and glossary are probably substantially unchanged during this iteration.

Analysis activities and products

For clarity, we have detailed only those activities and products that are most directly involved in this iteration.
Note also that the flow of activities is indicative and is not intended to be prescriptive.
